Eren Tolga TEKIN

Paris, France | erentolgatekin0@gmail.com | +33 6 95 37 53 02 | LinkedIn | GitHub | Portfolio

6-Month End-of-Studies Engineering Internship (2027)

Education

Master's Degree in Computer Science & Engineering (5-year program) | ISEP, Paris, France 2022 – 2027

Coursework: Artificial Intelligence, Databases & Big Data, Cloud Computing & Cybersecurity, Systems Architecture

Academic Exchange | Inha University, Incheon, South Korea 2024

Coursework: Computer Vision, Signals and Systems, Sensor Engineering

Core Skills

- **Programming Languages:** Python, SQL, Java, TypeScript, Dart, Shell
- **Frameworks:** PyTorch, scikit-learn, Hugging Face, OpenCV, YOLO, FastAPI, Spring Boot, React, Flutter
- **Tools & Platforms:** Kafka, Spark, PostgreSQL, SQLite, OpenSearch, Docker, Linux, Git, pytest
- **Languages:** French (Native), Turkish (Native), English (Fluent, TOEIC 885), Japanese (Elementary)

Projects & Experience

AI Document Search Engine – Generative AI | Thales *Ongoing*

- Engineered a GenAI platform deploying LLM agents to search and analyze documents via RAG and GraphRAG.
- Integrated OpenSearch to combine keyword matching and vector embeddings for hybrid search.
- Compared and documented different search technologies to identify the best architecture for large documents.

MyBelly – Agentic AI & Mobile Nutrition App

- Developed a mobile assistant using Claude function-calling to track daily nutrition and food inventory.
- Integrated 19 function-calling tools with prompt caching to minimize latency and token costs.
- Engineered an offline-first Flutter app using local SQLite with background sync to Supabase.

LUCID – AI Safety & Guardrails

- Engineered a Python safety layer to protect AI agents from hostile inputs and tool abuse.
- Architected a three-stage pipeline to sanitize prompts, enforce tool constraints, and redact outputs.
- Built a deterministic safety engine adding sub-2ms latency with zero token cost.

MIRAGE – AI Red Teaming Framework

- Engineered an automated Red Teaming framework to test the security and robustness of AI agents.
- Implemented 15 attack vectors from OWASP Top 10 for LLMs to test prompt injections and tool abuse.
- Built deterministic evaluation oracles to detect unauthorized actions and compute resilience scores.

Certifications

- IBM Machine Learning Professional Certificate
- IBM AI Engineering Professional Certificate
- Google Cybersecurity Professional Certificate
