6-Month End-of-Studies Engineering Internship | AI & Data Science (2027)

Profile

Final-year IT engineering student at ISEP Paris specializing in AI and Data Science. Hands-on experience building end-to-end applications in real-time data streaming, generative AI, and computer vision.

Click blue links to view live demonstrations and verified credentials.

Core Skills

- **Programming Languages:** Python, SQL, Java, C, TypeScript, Dart, Bash
- **Frameworks & Libraries:** PyTorch, scikit-learn, OpenCV, Hugging Face, FastAPI, Spring Boot, React, Flutter
- **Tools & Platforms:** Kafka, Spark, Airflow, PostgreSQL, OpenSearch, Docker, Linux
- **Languages:** French (Native), Turkish (Native), English (Fluent | [TOEIC 885](#)), Japanese (Elementary | Actively learning)

Education

IT Engineering Degree (5-year program) | ISEP, Paris, France 2022 – 2027

- Coursework: Artificial Intelligence, Databases & Big Data, Cloud Computing & Cybersecurity, Systems Architecture

Academic Exchange | Inha University, Incheon, South Korea 2024

- Coursework: Computer Vision, Signals and Systems, Sensor Engineering

Projects & Experience

GenAI Document Intelligence Platform | ISEP × Thales Services Numériques *Ongoing*

Industrial R&D platform evaluating semantic search, RAG, and GraphRAG architectures on enterprise docs.

- Benchmarked lexical search, RAG, GraphRAG, and Knowledge Graphs on technical documentation.
- Automated entity and relationship extraction to build queryable domain knowledge graphs at scale.
- Engineered backend microservices with Java 25, Spring AI, and OpenSearch using Hexagonal DDD.

GhostNet – Real-Time Threat Intelligence Pipeline

Full-stack cybersecurity platform ingesting live global threat feeds into real-time streaming analytics.

- Engineered a distributed streaming pipeline ingesting 4 live threat feeds via Kafka and Spark.
- Trained an ML classifier predicting repeat offenders with 93% recall across 24,566 active IPs.
- Deployed a FastAPI and React dashboard streaming live MITRE ATT&CK telemetry via WebSockets.

Coldeye – Real-Time Computer Vision Perception System

Complete multi-camera surveillance system processing high-throughput video streams in real time.

- Engineered a real-time vision pipeline tracking people and objects with YOLO11 and ByteTrack.
- Extracted human pose keypoints to classify posture dynamics and item manipulation sequences.
- Built an append-only event engine in SQLite exposed via FastAPI and a Next.js MJPEG live stream.

MyBelly – Agentic Nutrition Assistant Application

End-to-end mobile application featuring an autonomous LLM agent with offline-first synchronization.

- Architected an autonomous mobile agent with 19 Claude function-calling tools and prompt caching.
- Implemented interactive confirmation flows for sensitive actions and automated routine habits.
- Engineered an offline-first mobile system using local SQLite with background sync to Supabase.

Retail Associate | Carrefour, Paris, France Mar. 2025 – Present

Part-time professional position held concurrently with full-time engineering studies.

Certifications

- [IBM Machine Learning Professional Certificate](#)
- [IBM AI Engineering Professional Certificate](#)
